The Solar Flagpole Light converts sunlight into energy to power this light at night without the need for electrical wiring! This LED light charges during the day allowing the light up to 12 hours of runtime at night with a max output of 640 lumens. Installation is a breeze and can be installed anywhere along a flagpole. The light and solar panel are both independently adjustable to adjust up to 180-degrees for optimal illumination for the light and sun light absorption for the solar panel.

## Product Features & Specifications

- **Color Temperature:** 6500K
- **Solar Panel:** Mono-crystalline silicone
- **Solar Panel Power:** 5.5V 4.5W
- **Brightness:** 320 Lumens per head
- **Housing Construction:** ABS + Stainless Steel
- **IP Rating:** IP65 wet rated
- **LEDs:** 6 PCS per head
- **LED Life Hours:** 100,000 hours
- **Battery:** Lithium Battery 3.7V/4400mAh
- **Charging Time:** 6-8 hours
- **Run Time:** 10-12 Hours
- **Color Rendering Index (CRI):** >70
- **Discharging Temperature:** -4°F ~ 122°F (-20°C ~ 50°C)
- **Sensors:** Photocell sensor
- **Warranty:** 1 year for fixture

**It is important to install this light in an area where it gets enough sunshine to charge properly!**

Fits 2"-6" diameter poles.
